

ABSTRACT

A printhead assembly is provided, comprising at least one printhead module comprising at least two printhead integrated circuits, each of which has nozzles formed therein for delivering printing fluid onto the surface of print media, and a support member supporting the at least two printhead integrated circuits, and a casing in which the at least one printhead module is removably mounted. The support member has at least one longitudinally extending channel for carrying the printing fluid for the printhead integrated circuits, and at least one fluid connector is provided to connect at least one printing fluid delivery hose from a printing fluid supply to the at least one channel at at least one longitudinal end of the at least one printhead module.
